Sir:

In reply to the Office Action dated July 16, 2002, please amend the above-identified application as follows:

IN THE CLAIMS:

Please amend claims 3-4 and 6-7 as follows:

3. (Thrice Amended) A delay time adjusting method of adjusting a delay time of an input first periodic signal so that a phase of said input first periodic signal and a phase of an output second periodic signal match each other based on a comparison between phases of said input first periodic signal and said input second periodic signal, the method comprising the step of:

adjusting said delay time so that, when a phase of a predetermined rising edge of said output second periodic signal is behind a phase of a predetermined rising edge of said input first periodic signal, said predetermined rising edge of said output second periodic signal matches a rising edge of said input first periodic signal, a phase of the
